PROFESSIONAL SUMMARY

Software Engineer (MEAN Stack) with **3+ years of professional experience** designing, building and maintaining **scalable, business-critical web applications**. I build **WinqoHub**, an **AI-powered order management system** with **20+ courier integrations**, multi-channel order sync (**Shopify, WooCommerce, Daraz**) and real-time **ERP inventory sync**, and ship AI features on the **OpenAI API** — natural-language reporting and autonomous agents. Strong in **Angular** front ends and **Node.js / Express.js / MongoDB** back ends, with hands-on **React, PostgreSQL** and **.NET** experience. Known for clean, reliable code, owning features from database to screen, and translating complex business requirements into dependable software.

PROFESSIONAL EXPERIENCE

Software Engineer (MEAN Stack)

03/2023 – Present

WinqoHub (formerly ShipKardo) — AI-powered e-commerce OMS FULL STACK 09/2023 – Present

- Develop and maintain the platform **end to end** — **Angular** front end, **Node.js / Express.js** APIs and **MongoDB** — used by online sellers to manage orders, stock, shipping and COD in one dashboard.
- Integrated **20+ courier services** — **BlueEx, TCS, Leopards, PostEx, M&P, Call Courier Trax** and others — into one booking and tracking workflow.
- Built **Shopify, WooCommerce / WordPress** and **Daraz** integrations for automated order syncing, plus integration with the **Splendid Accounts** inventory system for **real-time stock**.
- Implemented complete **Product Management** modules: product listing, updates and inventory synchronization.
- Developed **email notifications** on **SMTP** and **transactional SMS** via **Monty Mobile** for order and status updates.
- Built **Natural Language Reporting** on the **OpenAI API**, so users request reports in plain language; now building **autonomous AI agents** that plan and execute tasks.
- Contribute to **architecture planning, code reviews** and **performance optimization**.

Splendid Accounts — cloud inventory & accounting ERP FRONT END 03/2023 – 06/2023

- Built **Angular** modules for **sale & purchase invoices and returns**, **point of sale (POS)**, inventory, CRM and **profit & loss** reporting.
- Implemented **role-based access control (RBAC)** — roles, permissions and rights enforced across menus, screens and actions.

STACK Angular | TypeScript | RxJS | REST APIs

NurseNova — healthcare platform BACK END 06/2023 – 09/2023

- Built the **Angular admin panel** for doctors, categories and medications, and the **Node.js / Express.js REST APIs** on **MySQL** consumed by the mobile app.

STACK Angular | Node.js | Express.js | MySQL

Mounties & WinQo — client projects

- **Mounties:** booking portal for an Australian children's play venue — parties, general admission and drop-and-dine — on **Angular, .NET** and **SQL Server**.
- **WinQo: Electron** desktop app that sends WhatsApp messages from the user's PC, on a local **MySQL** database.

STACK Angular | .NET | SQL Server | Electron | MySQL

Web Developer

11/2022 – 03/2023

3DM Solutions

- Developed **responsive, user-friendly websites** and **WordPress / WooCommerce** product catalogues for laboratory and scientific-supply clients (Summit Diagnostix, Laboratory Solutions, Chem Tech Pakistan).
- Built **reusable UI components** and optimized front-end code for **performance, load time and SEO**.
- Worked with **UI/UX designers** and back-end developers to turn mockups into **pixel-perfect, cross-browser** interfaces, following clean-code and **Git** workflows.

STACK HTML | CSS | Bootstrap | JavaScript | WordPress | WooCommerce | Elementor

Software Engineer Intern

05/2022 – 11/2022

Service4Digital

- Implemented **new features, UI improvements** and **bug fixes** on live web applications alongside senior developers.
- Took part in **debugging, testing and deployment** across the full **software development lifecycle (SDLC)**.

STACK HTML | CSS | Bootstrap | JavaScript | Git

SELECTED PROJECTS

ClearPort ERP — multi-tenant customs clearing & freight forwarding SaaS 2026

- Designed and built **end to end** a **12-stage clearing pipeline** — BL → ETA → job file → GD / DO / NOC → gate pass → delivery → vouchers → bill → SOA — linked by one job-file number.
- **Multi-tenant PostgreSQL** schema with **Prisma**; **Turborepo monorepo** sharing **Zod** schemas and an **RBAC** matrix between the Express API and React app.
- Security: **rotating refresh tokens** with reuse detection, **TOTP 2FA** with **AES-256-GCM** encrypted secrets, race-free per-company sequences.
- **Socket.IO** real-time alerts, **BullMQ** background jobs, **Puppeteer** PDFs, Excel exports, full-text search and structured logging; **Dockerized**.

STACK React 18 | TypeScript | Node.js | Express | PostgreSQL | Prisma | TanStack | Tailwind CSS | Socket.IO | BullMQ | Redis | Docker

RobeApp — management system for a cloth & tailoring brand Ongoing

- Full **MEAN** application: **garment measurements** with history, **meter-based inventory**, sale & purchase invoices, payments, employee loans & wages, expenses and **14 business reports**.
- Made stock and money movements **atomic and reversible** (revert-then-apply, server-side totals) and hardened auth with **token versioning** and query whitelisting, covered by **Jest** tests.
- **Roles & permissions**, activity log, KPI dashboard, **PDF invoices** and **Excel exports** on a shared Angular design system with dark mode.
