PROFESSIONAL SUMMARY

Full-Stack Software Engineer (MEAN Stack) with **3+ years of professional experience** designing, building and maintaining **scalable, business-critical web applications**. At i-Splendid I work across the whole stack of **WinqoHub**, an **AI-powered multi-tenant order management platform** with **20+ courier integrations**, **Shopify, WooCommerce and Daraz** order sync, real-time **ERP synchronisation** and **AI agents** built on the **OpenAI API**. Strong in **Angular** front ends and **Node.js / Express.js / MongoDB** back ends, with production work on **.NET, SQL Server, MySQL** and **Electron**. Outside work I build complete **multi-tenant SaaS ERPs** end to end on **React, PostgreSQL** and **Angular** — customs clearing, trading with **double-entry accounting**, and tailoring. Known for owning features **from database to screen** and turning complex business requirements into dependable software.

PROFESSIONAL EXPERIENCE

Software Engineer (MEAN Stack)

03/2023 – Present

i-Splendid · Karachi

WinqoHub (formerly ShipKardo) — AI-powered multi-tenant OMS · Full stack 09/2023 – Present

- Develop and maintain features **end to end** — **Angular** front end, **Node.js / Express.js** APIs and **MongoDB** — for a **multi-tenant SaaS** used daily by online sellers.
- Integrated **20+ courier services** — **BlueEx, TCS, Leopards, PostEx, M&P, Call Courier Trax** and the newest, **ShipZo** — behind one booking, tracking and status-mapping workflow.
- Built **Shopify, WooCommerce / WordPress** and **Daraz** integrations for automated order and product sync, plus **real-time inventory sync** with the **Splendid Accounts ERP**.
- Built complete **Product Management** modules — listings, updates and **inventory synchronisation**.
- Implemented **SMTP email notifications** and **transactional SMS** via **Monty Mobile** for order and status updates.
- Built **Natural Language Reporting** on the **OpenAI API** and worked on the **"Ask AI" agent** — consolidating its **tool set** and enforcing business rules so answers stay accurate; building **autonomous AI agents**.
- Sped up heavy order reports with **targeted indexes** and leaner **aggregation pipelines**; contribute to **architecture planning** and **code reviews**.

Stack: Angular, TypeScript, Node.js, Express.js, MongoDB, ag-Grid, Socket.IO, Puppeteer, OpenAI API, LLM tool-calling, Shopify API, REST APIs

Splendid Accounts — multi-tenant cloud ERP & accounting · Front end 03/2023 – 06/2023

- Built **Angular** modules for **sale & purchase invoices and returns**, **point of sale (POS)**, **inventory**, **CRM** and **profit & loss** reporting on an ERP used in **Pakistan, Saudi Arabia and Malaysia**.
- Implemented **role-based access control (RBAC)** — roles, permissions and rights enforced across menus, screens and actions.

Stack: Angular, TypeScript, RxJS, Nebular, Syncfusion EJ2, ECharts, REST APIs

NurseNova — family health app · Admin panel & APIs 06/2023 – 09/2023

- Built the **Angular admin panel** for doctors, specialties, the **vaccination catalogue** and support content.
- Developed **Node.js / Express.js REST APIs** on **MySQL** for the mobile app — **family profiles**, health history, medical records, **medication & vaccination reminders** and **nearby-doctor search**.

Stack: Angular, Node.js, Express.js, Sequelize, MySQL, JWT

Mounties — multi-location venue booking platform · Australian client

- Worked on **booking wizards** for birthday parties, drop-and-dine and general admission with **Stripe Checkout** deposits, **slot and room availability**, pricing rules and a back office with **reports, PDF and Excel export**.

Stack: Angular, ASP.NET Core, C#, Entity Framework Core, SQL Server, Stripe, Hangfire

WinQo — desktop WhatsApp messaging gateway

- Built an **Electron** app that links WhatsApp numbers by QR, pulls message tasks from **Splendid Accounts, WinqoHub** or any **custom REST API**, sends them **round-robin** and reports delivery back — on embedded **SQLite** with **AES-256-GCM** encrypted credentials.

Stack: Electron, Node.js, whatsapp-web.js, Puppeteer, SQLite

Web Developer
11/2022 – 03/2023

3DM Solutions

- Developed **responsive, user-friendly websites** and **WordPress / WooCommerce** product catalogues using **HTML, CSS, Bootstrap and JavaScript**.
- Built **reusable UI components** and optimised front-end code for **performance, load time and SEO**.
- Turned designs into **pixel-perfect, cross-browser** interfaces with **UI/UX designers** and back-end developers, following **clean code** and **Git** workflows.

Software Engineer Intern
05/2022 – 11/2022

Service4Digital

- Implemented **new features, UI improvements** and **bug fixes** on live web applications using **HTML, CSS, Bootstrap and JavaScript**.
- Took part in **debugging, testing and deployment** across the full **software development lifecycle (SDLC)**.

INDEPENDENT PROJECTS

Manifest ERP (formerly ClearPort ERP) — customs clearing & forwarding SaaS 2026

- Designed and built **end to end** a **multi-tenant ERP** covering the full **17-step clearing workflow** — ETA sheet, job files, **14 customs stages**, pay orders, gate passes, deliveries, empty returns, **billing & SOA** and a **bank ledger**.
- **Self sign-up**, company setup and invitations; **66 permissions** across 5 roles enforced on the server; **tenant isolation** by company on every query.
- **15 reports** with Excel / PDF export, verified by **114 automated checks**; **rotating refresh tokens**, **TOTP 2FA**, **Socket.IO**, **BullMQ** jobs and **Puppeteer** PDFs.

Stack: React 18, TypeScript, TanStack, Tailwind CSS, Node.js, Express, Zod, PostgreSQL 16, Prisma, Redis, Docker, Vitest

Vantra ERP (formerly Cuba POS) — multi-company trading ERP with POS 2026

- Rebuilt an invoice-only POS into a full ERP: **sales, purchases, inventory, POS** and automatic **double-entry accounting**.
- One **document engine** for 8 document types with **posting rules** that keep the books balanced; **moving-average costing** on an immutable stock ledger.
- **20 reports** including P&L and balance sheet, **custom roles** with a permission matrix, activity log and an in-house **Angular 17** UI kit.

Stack: Angular 17, Signals, TypeScript, Node.js, Express, MySQL 8, Sequelize, JWT

Atelier One (formerly RobeApp) — multi-company tailoring business suite Ongoing

- **Garment measurements** with history, **meter-based stock**, workshop order stages, payments, purchases, **staff wages & loans**, expenses and **13 reports**.
- **Self sign-up** with a 14-day trial and **company isolation** enforced by a Mongoose plugin; **RBAC**, token versioning and an audit trail, covered by **56 Jest tests**.

Stack: Angular 18, Angular Material, Node.js, Express.js, MongoDB, Mongoose, PDFKit, Jest

SKILLS

Core	**Angular** **Node.js** **Express.js** **MongoDB** **TypeScript** **JavaScript**
Front end	**React** **RxJS** **Angular Material** **Tailwind CSS** **HTML / CSS** **Bootstrap** **ag-Grid**
Back end	**REST APIs** **JWT & 2FA** **RBAC** **Multi-tenancy** **Socket.IO** **BullMQ / Redis** **.NET** **Electron**
Databases	**MongoDB** **PostgreSQL** **Prisma** **MySQL** **SQL Server** **SQLite**
AI	**OpenAI API** **AI agents** **LLM tool-calling** **NL reporting**
Integrations	**20+ Courier APIs** **Shopify** **WooCommerce** **Daraz** **Stripe** **SMTP** **SMS**
Tools	**Git / GitHub** **Docker** **Jest / Vitest** **Puppeteer** **NPM / pnpm**

ACHIEVEMENTS & CERTIFICATES

Employee of the Month — i-Splendid 04/2024

Intermediate JavaScript Development — Udemy Certificate

EDUCATION

BS in Computer Science 01/2019 – 01/2023 | Karachi
University of Karachi

Intermediate 2016 – 2018 | Karachi
Govt. Degree College, Malir Cantt

Matriculation 2004 – 2016 | Karachi
The Educators (Malir Campus)
